KS2

Progress

Progress is calculated by comparing our children with children who attained similarly to them at KS1.

The Government states:

Interpreting progress scores

Progress scores are centered around 0 with most schools being in the range of -5 to +5. A score of 0 means that children in this school in this school, on average, do as well at KS2 as those with similar prior attainment nationally.

A positive score means that children in this school, on average, do better at KS2 as those with similar attainment nationally.

A negative score means children in this school, on average, do not do as well as those with similar prior attainment nationally.

A negative score does not mean that the children did not make any progress, just less progress than other children nationally with similar starting points.
